

Semi-formal curriculum

Intent

The semi-formal curriculum creates a steppingstone to bridge the gap between the pre-formal and formal curriculum. It provides pupils with the opportunities to develop functional skills to equip them for their future journey.

Our approach allows us to promote what our learners need and provide a strong foundation for life. We offer a holistic approach with meaningful teaching and learning opportunities so that children learn to transfer and generalise their skills to real-life experiences.

The semi-formal curriculum is flexible and allows time for children to consolidate their learning. It prioritises individual learning needs. It promotes independence, confidence and self-esteem and be varied, engaging and fun.

The semi-formal curriculum provides range of experiences that enable our children to develop interests and grow as individuals, working towards being the best version of themselves. We strive for success for every child.
